#### Notes

- Read this instruction carefully before starting installation.
- Proper tools will improve the quality of installation and reduce the time required.
- If missing parts or any damage found, please take a picture, and contact us.

### Installation Instruction

#### 1 Step1

- (1) Install the "PART B" into the "PART A" and tighten up it with 2 of "PART E1", 4 of "PART E3", 2 of "PART E4".
- (2) Tighten all with M6 Allen Wrench.

#### 2 Step2

- (1) Mount the radar with "PART E2" and "PART E5" and screw directly.
- (2) Use the screws of "PART F1" and "PART F2" to install directly and tighten.
- (3) All accessories installed.

#### 3 Step3

- (1) Align the 4 holes on the car and install with the original car screws.
- (2) Install the "PART C" into the car frame and tighten up it with 4 of "PART F3", 4 of "PART F4", 8 of "PART F5", 4 of "PART F6".

Use the original car screws here.

**Enjoy Your New Nlight Bumper!**
