- 4** There will be 8 18mm nuts that attach the bumper to the frame, use 18mm socket and remove these 8 nuts. There are four on each side of the frame. After removing the 8 nuts, slide the factory bumper off.

- 5** You are ready to install the Nlight Front Bumper using the following parts:

- 6** Install the winch plate using the previously removed factory screws.

7 Install the front bumper with led lights,hoop,and Flip-Up License Plate Holde

8 The Nilight front bumper has 3 bolts in each side. Those three bolts will slide directly into the same mounting holes the original bumper was removed from. The 4th hole in each side will receive a bolt that came in the parts bag supplied with the bumper.

9 Each of the 3 pre-installed bolts will attach with a flat washer, lock washer and nut. All 8 bolts connections will be tightened as shown partially completed in the following pictures.
